1. Executive Summary

Project Yellow Card is a bipartisan, non-amnesty immigration framework designed to address the humanitarian and security crisis at the U.S. border while disrupting the multi-billion-dollar criminal networks that profit from illegal migration. It creates a legal channel for economic migrants through a paid, verified application process, reducing asylum abuse and transforming illegal-crossing funds into lawful national revenue. It also permits lawful re-entry for cardholders after temporary travel abroad.

2. Policy Context & Rationale

Over 6 million unlawful border crossings occurred between FY 2021–2024, costing billions in enforcement and humanitarian support. Transnational networks earn \$4–6 billion annually from smuggling and trafficking. The Yellow Card redirects these funds into regulated, lawful investment and stabilizes migration flows.

3. National Economic Impact

- Immigrants send more than \$200 billion abroad each year in remittances — funds that leave the U.S. economy.
- Undocumented immigrants already pay around \$96.7 billion in federal, state, and local taxes annually.
- With lawful authorization, the U.S. could gain an additional \$40 billion in annual revenue.
- Without a program like Yellow Card, the U.S. loses hundreds of billions in taxable activity, spending, and local reinvestment each decade.

4. State Focus: Bipartisan Implementation

Project Yellow Card applies to the four most immigrant-populous and politically diverse states: California, Texas, Florida, and New York. Combined, they represent over half of the

nation's immigrant population. Each faces distinct migration, labor, and public-cost challenges that the Yellow Card can address through legalization, revenue generation, and social stability.

5. Yellow Health – Immigrant Health Insurance Plan

Yellow Health is a proposed government-backed health insurance program for immigrants with no legal status, allowing them to pay directly for their own coverage instead of relying on Medicaid or emergency services. If 11 million participants pay an average premium of \$3,000 annually, the program could generate \$33 billion per year — reducing the federal health burden while improving public health outcomes.

6. Legislative & Advocacy Strategy

Federal: Engage bipartisan offices on the House Judiciary Subcommittee on Immigration and the Senate Homeland Security Committee.

State: Coordinate pilot compacts through CDSS, Cal OES, DMV, and DOJ models.

Advocacy Messaging:

- Not amnesty, accountability.
- Redirect crime profits into lawful progress.
- Safe Communities, Smart Governance.
